

Galvanised Steel Top Sheet and Bottom Tray

Pressed steel tray with a top pressed steel lid bonded in position with the double fold locked edge detail

Panel Grade	Point Load	Load Over	UDL	Panel Thickness (Nominal)	System Weight (Typical)
Medium	3kN	4.5kN	8.0kN/m ²	29MM	33kg/m ²

▼ RFS-Medium 4x4 Medium Grade Panel

This panel consists of a high grade 28mm chipboard core with steel top sheet and bottom tray all roll formed together creating a fully steel encapsulated panel to be loose laid with complete electrical continuity. The resulting panel is dimensionally accurate with a rigid perimeter that is exceptionally resistant to damage.

▼ Certification

The panel has been fully tested by a NAMAS accredited laboratory to the MOB PSA PF2 PS/SPU March 1992 Medium Grade specification and is certified as being fully compliant. All PSA panels have a 3 times working load safety factor, class 'O' spread of flame resistance and 25year guarantee.

▼ Finish

All of our steel encapsulated panels are designed to be overlaid with finishes by others such as loose laid carpet tiles. Whatever your requirements, Raised Floor Systems will have the flooring solution to suit you.

▼ Manufacture

All panels are manufactured in the UK, which allows us to offer total flexibility whilst maintaining the highest possible quality standard and ensures fast reaction and a reliable service. Materials used are sourced from high quality suppliers and use renewable, sustainable sources and suppliers wherever possible. We can also offer a bespoke service and specialise in replicating and reproducing existing raised floors.

▼ Accessories

Accessories include ramps, steps, handrails, subfloor seal, fire barrier, grilles, up stands, perforated panels, air leakage control, bridging, stringers, service outlets, cavity barrier and lifting tools.
